

Application Highlight

Chesterton SuperSet: SpiralTrac™ + DualPac 2212

Pulp & Paper | Paper Stock | Packing

Application Info & Challenge

- **Centrifugal pumps, fan pumps, agitators**
- **Product:** Raw Water with high percentage of solids, 1.5% Paper Stock

A specialist in the Czech Republic needed to supply packing for a large shut down at a paper mill. There were various applications to seal, like centrifugal pumps, fan pumps and agitators etc. Media are raw water with a higher percentage of solids, paper stock of 1.5%.

The challenges with sealing abrasive media are the short life of packing and fast sleeve wear.

Excessive product leakage

Solution & Result

- Chesterton DualPac™ 2212 packing on most applications
- Chesterton SuperSet™ with **Packing Version SpiralTrac** and 2212 packing.

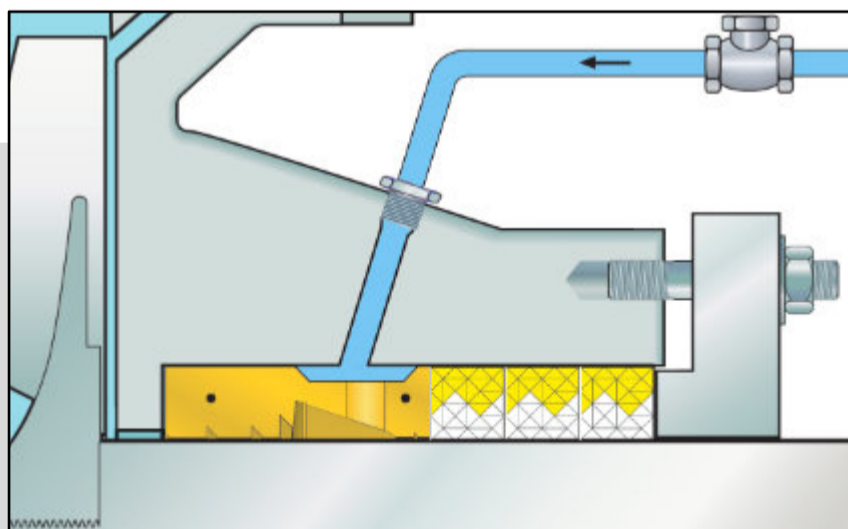

Applications have been installed during the shut down and are **running without issues** for 6 months!

"We have just positive installation experiences with smooth start-up and break-in of packing." - *feedback from customer*

Chesterton Solution Being Installed

* EnviroSeal always recommends flow controls when installing a Packing Version SpiralTrac.

Chesterton SuperSet: SpiralTrac + 3 rings of DualPac 2212

Packing Version SpiralTrac

DualPac 2212 Packing
